Mizzou Therapy Services
Attn: Cait Kissinger
525 N Keene St, Suite 101
Columbia, MO 65201

COURSE DESCRIPTION:

Two-day workshops present non-traditional assessment and intervention strategies appropriate for the development of communication in individuals having severe multiple differences, developmental differences and/or autism. Information is relevant to the needs of those individuals who are currently unable to communicate their wants and needs spontaneously in their environment, regardless of age or severity of physical and/or cognitive differences. Techniques incorporate current research in the areas of communication, education and sensory integration.

LEARNING OUTCOMES:

Participants will be able to:

- Distinguish language from communication and understand the prerequisite skills necessary for each.
- Recognize and assess abilities rather than disabilities through a process-oriented assessment approach.
- Design an effective individualized communication program that builds on the abilities identified through the Every Move Counts assessment package.
- Effectively integrate communication training into daily activities by providing appropriate choice-making opportunities.
- Progress through a hierarchy of alternate and augmentative communication systems in order to identify and provide the system that best meets an individual's needs and abilities.

Substitution and Refund Policy:

A full refund of fees less a \$25 administrative fee will be made if notice of cancellation is received, in writing, prior to February 20, 2020 (kissingerc@health.missouri.edu) No refunds will be made after February 20, 2020.

Grievances:

In the event of a grievance, attendees may record their grievances in the comments section of the course evaluation or communicate directly to the planning committee.
